## SEATING TOILETS WITH OPTIONAL HANDRAILS

Our Sitting Toilets are designed to be fitted on to our Self-Supporting Squatting Slabs. Bolts along the bottom secure the toilets on to the slabs. Our Sitting Toilets are convenient for those who cannot squat for age or health reasons, or simply because they are not culturally accustomed to doing so. Handrails can optionally be fitted on to the Squatting Slabs. The toilets come with a hinged lid.

### Packing and Transport

#### 1. Sitting Toilets

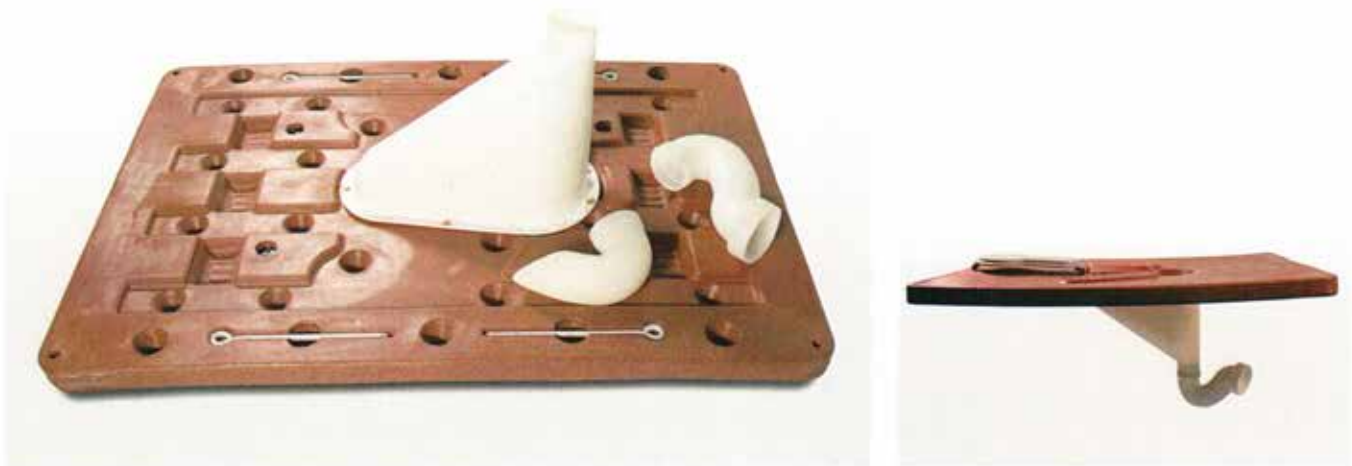

a.	Quantity that fit on a EUR-1-Pallet	16 pcs of Sitting Toilets
b.	Dimensions of loaded EUR-1-Pallet	1200 mm x 800 mm x 1950 mm
c.	Gross weight of loaded EUR-1-Pallet	130 kgs
d.	Number of EUR-1-Pallets and Sitting Toilets that fit in a 20 ft. container	11 loaded Pallets, or 176 pcs of Sitting Toilets, fit in a 20 ft. container
e.	Number of EUR-1-Pallets and Sitting Toilets that fit in a 40 ft. container	24 loaded Pallets, or 384 pcs of Sitting Toilets, fit in a 40 ft. container

#### 2. Handrails

a.	Quantity that fit on a EUR-1-Pallet	16 sets of Handrails
b.	Dimensions of loaded EUR-1-Pallet	1200 mm x 800 mm x 2200 mm
c.	Gross weight of loaded EUR-1-Pallet	120 kgs
d.	Number of EUR-1-Pallets and Handrails that fit in a 20 ft. container	11 loaded Pallets, or 176 sets of Handrails, fit in a 20 ft. container
e.	Number of EUR-1-Pallets and Handrails that fit in a 40 ft. container	24 loaded Pallets, or 384 sets of Handrails, fit in a 40 ft. container

#### Advantages

1. Minimal assembly required prior to use.
2. Hand-washing graphic reminder provided on the lid.
3. Light weight and easy to manoeuvre.
4. Unique "nesting" feature makes it easy to stack and pack.
5. Light weight, low thickness and nestability reduce storage and transportation costs.
6. Highly chemical-resistant, making them easy to maintain and clean.
7. Designed in collaboration with leading international aid agencies.

Our Pans and Traps can be bolted below our Self-Supporting Squatting Slabs to create a water seal. The traps are of two types:

- P-Trap that is used for an offset pit.
- Goose-Neck Trap that is used when the pit is directly below the Squatting Slab.

#### Advantages

1. Highly scratch-resistant.
2. Greatly reduced water consumption because of glossy and smooth inner surface of pan, steep slope of 35° and water seal of only 20 mm.
3. Unique "nesting" feature makes the pans easy to stack and pack.
4. Reduced storage and transportation costs.
5. Highly chemical-resistant, making them easy to maintain and clean.
6. Sized to fit with standard pipes and fittings.
7. Virtually unbreakable.

#### Packing and Transport

a.	Quantity that fit on a EUR-1-Pallet	175 sets of Pans and Traps
b.	Dimensions of loaded EUR-1-Pallet	1200 mm x 800 mm x 2150 mm
c.	Gross weight of loaded EUR-1-Pallet	175 kgs
d.	Number of EUR-1-Pallets and sets of Pans and Traps that fit in a 20 ft. container	11 loaded Pallets, or 1925 sets of Pans and Traps, fit in a 20 ft. container
e.	Number of EUR-1-Pallets and sets of Pans and Traps that fit in a 40 ft. container	24 loaded Pallets, or 4200 sets of Pans and Traps, fit in a 40 ft. container

Our Children's Toilets are designed to be fitted on to our Self-Supporting Squatting Slabs. Bolts along the bottom secure the toilets on to the slabs. They offer greater safety, and soothe and comfort the child who might find the keyhole intimidating. The toilets come with a hinged lid.

### Advantages

1. Minimal assembly required prior to use.
2. Hand-washing graphic reminder provided on the lid.
3. Light weight and easy to manoeuvre.
4. Unique "nesting" feature makes it easy to stack and pack.
5. Light weight, low thickness and nestability reduce storage and transportation costs.
6. Highly chemical-resistant, making them easy to maintain and clean.
7. Designed in collaboration with leading international aid agencies.

### Packing and Transport

a.	Quantity that fit on a EUR-1-Pallet	80 pcs of Children's Toilets
b.	Dimensions of loaded EUR-1-Pallet	1200 mm x 800 mm x 2250 mm
c.	Gross weight of loaded EUR-1-Pallet	214 kgs
d.	Number of EUR-1-Pallets and Children's Toilets that fit in a 20 ft. container	11 loaded Pallets, or 880 pcs of Children's Toilets, fit in a 20 ft. container
e.	Number of EUR-1-Pallets and Children's Toilets that fit in a 40 ft. container	24 loaded Pallets, or 1920 pcs of Children's Toilets, fit in a 40 ft. container

## Hygienic. Safe. Convenient. In case of any emergency.

Open defecation is more than an unsightly problem. It leads to contamination of water and causes numerous ailments. Providing sanitary facilities to the population is not an easy task, made even more difficult in the case of relief work or emergencies. Is there a hygienic, low-cost and high-quality solution?

Nagmagic Self-Supporting Plastic Squatting Slabs are the quickest and most efficient method for building latrines in emergencies.

Light weight and moulded, these Squatting Slabs can be placed over trenches or pits up to 1 metre wide, while just 100 mm rests on firm ground. The uniform shape, low thickness and a unique "nesting" feature makes them portable and easy to transport. The slabs come with a hinged lid, and also have embedded metal inserts to make them rigid and stable. The Slim Slabs have additional reinforcements to make them even more stiff.

In fact, this product is today the international standard for aid agencies around the world and is shipped to all corners of the globe when there is an emergency and a need to quickly set up sanitation facilities.

## Advantages of Nagmagic Self-Supporting Plastic Squatting Slabs

Besides convenience and ease of use, the slabs have several other advantages:

1. One-piece plastic moulding means no joints or loose parts that can fall off.
2. The ready-to-use slabs require no assembly.
3. The self-supporting slabs do not need additional reinforcements.
4. Light weight and easy to manoeuvre.
5. The slabs are available in two thickness variants - 55 mm and 40 mm.
6. The slabs can be used either as Direct-Drops or as Water-Seals.
7. Slope towards the key hole enables easy draining of water.
8. Four tent pegs for attaching the slab to the ground are provided. They are stored in slots on the underside of the slab.
9. Hand-washing graphic reminder provided on the inside of the lid.
10. Unique "nesting" feature makes them easy to stack and pack.
11. Light weight, low thickness and nestability reduce storage and transportation costs.
12. Designed for palletisation as per European standards, in collaboration with leading international aid agencies.
13. The slabs are highly chemical-resistant, making them easy to maintain and clean.
14. Available with multiple accessories such as Pans and Traps (to provide a water seal), a Sitting Toilet, Handrails that can be used with the Sitting Toilet, and a Children's Toilet.
